Next time you're surfing the net, make sure to visit our improved website featuring **information on issuance of the NexGen bills**, a photo parts catalog, online ordering form, repair service, and more.

## Parts are Parts

### Part No. 900-100031

**Description:** Foam Square, 4 x 4mm, DBV-200

**Usage:** These foam squares are used to ensure proper alignment of the two sensor harnesses on the older DBV-200 upper guide assemblies.

**Note:** DBV-200 validators manufactured before June of 2000 may need these foam squares installed on both sides of the cross-channel sensors to prevent the sensor harnesses from being crimped. JCM Engineering changed the design of the upper guide in June 2000 to include two molded plastic tabs that ensure proper alignment of the harnesses and prevent crimping.

The list of JCM bill validator software provided herein notifies customers of the latest versions developed. However, the listing does not identify versions approved by gaming jurisdictional authorities for actual use. Customers should consult JCM's Customer Service/Parts Sales departments concerning approved versions for jurisdictions of intended use.

## JCM at the G2E - Come see us at Booth #420!

JCM invites you to join us in celebrating one million validators sold worldwide, and view our complete product line at G2E. JCM is the exclusive sponsor of the "New Product Showcase" (Booth #2639) highlighting new products from over 15 gaming companies. Please stop by our booth #420 at the Las Vegas Convention Center, Sept. 17-19.

**Featured Products for G2E**

JCM's **Sentry** is the smart bill acceptor faceplate with colored LED's showing up to six denominations and bar code, plus five error indicators, and a cash box full indicator.

JCM's **Thermal Printer Series 200** uses fan-fold paper for optimum performance, while allowing the customer the freedom to create a unique 4-color design on the top surface.

JCM's **Intelligent Cash Box** system increases efficiency in the soft drop and count process for casino operators. The system uses a memory module in the cash box and an additional sensor in the WBA-12/13 to track the currency entries for a specific slot machine.

What is it? Come to our booth and see all of our new technologies.
