Parts are Parts

Part No. 400-100109

Description: Harness, Conv. WBA X2/X3 to PS15-006

Usage: This harness is an adapter used with the PS15-006 (Part No. 550-100042) diagnostic power supply for the WBA product line. It can also be used as an adapter on the DT-004 for upgrading Flash software on WBA units.

Note: JCM Engineering designed this adapter to allow a quick change from the 12-pin WBA-10/11 connector to the 20-pin WBA-12/13 connector. This adapter cannot be used in a "live" application, because it does not allow the second set of serial port signals to be communicated to the host.

Customer Notification/Tech Tips:

Product: WBA-XX units

Occurance: Rare

Mandatory Upgrade: None Required

Issue: This is additional information on the WBA-XX frame tab adjustment. JCM Engineering has determined there is a potential 2 to 3 mm tolerance issue on a small number of WBA frames. This can create a gear skipping noise. It can also cause the transport motor to run continuously, while the stacker searches for the home position, until the unit reaches an error condition.

Resolution: This is resolved by properly aligning the tabs. JCM produces a special tool (Part No. 501-000095), available at no charge, to accomplish this alignment. Please contact our Technical Support Group at (800) 683-7248 for more information, or to receive the adjustment tool and any additional support you may need.
