Parts are Parts

Part No: 550-100018

Description: WBA-1X-Head

Usage: This is the modular head component of the complete WBA unit that contains the sensing and currency identification technology. It can be easily removed from the WBA by pressing down on the head release bar and sliding the head out.

Note: All WBA-1X units use the same head to validate currency regardless of the transport or CPU type. JCM engineering designed the head to facilitate "on the floor" troubleshooting of a unit. The two entrance sensors activate the motors that pull currency into the unit where it is read by different types of state-of-the-art optical and magnetic sensors. The WBA unit determines if it is a valid US note, barcode ticket/coupon, or custom designed scrip and its denomination. Valid notes are then moved into the transport section of the unit.

The list of JCM bill validator software provided herein notifies customers of the latest versions developed. However, the listing does not identify versions approved by gaming jurisdictional authorities for actual use. Customers should consult JCM's Customer Service/Parts Sales departments concerning approved versions for jurisdictions of intended use.

* i suffix indicates Intelligent Cash Box option.

Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash box/cash flow management system that allows the operator to track a cash box and its contents through the entire cash flow process. The ICB system eliminates the need for dedicating cash boxes to specific machines, or putting barcode identification on the cash boxes. The cash boxes are tracked electronically eliminating most variance issues.

Customer Notification/Tech Tips:

Question: Where can I find NexGen software information for JCM products?

Answer: JCM is continually updating our online software database. The database can be found at www.jcm-american.com under the Customer Service/Library/Software information menu. It contains of the following features:

- Drop-down categories to make the software search easier.
- The latest software released by JCM Engineering is displayed at the top of the list matching your search criteria.
- Left-clicking on the word “Software” next to each version displays a more detailed description.
- DIP switch settings are also listed for the software.
- General notes can be viewed containing additional information about each software version.
