## Parts are Parts

**Part No.** 053623 Spring, Earth Plate (L)  
053624 Spring, Earth Plate (R)

**Description:** Ground Plate Spring, left and right

**Usage:** These spring plates provide a grounding path for static discharge from the validator head.

**Note:** These springs can bend from rough handling of the validator head. If this happens, the static discharge path is broken. The springs can easily be straightened by removing them from the cover plate and flattening. If a spring is broken, replace it by removing the bill validator head from the WBA transport assembly and removing the Phillips head screw securing the spring in place.
