UBA Frame Assembly Prism

Part No. 200-100293

Description: UBA Frame Assembly

Usage: This is the standard frame available for the UBA Validator.

Note: The UBA Frame Assembly is different from a WBA Frame Assembly. One noticeable feature is that the reflective prism used for the feed out sensor has been moved to the frame from its transport location. This helps provide easy access to it for cleaning during preventative maintenance procedures. Another new feature is the Spring Tension Latching Mechanism which allows easier Cash Box installation and removal. This frame assembly is used for UBA Models 10, 11 & 14.

The list of JCM bill validator software provided herein notifies customers of the latest versions developed. However, the listing does not identify versions approved by gaming jurisdictional authorities for actual use. Customers should consult JCM's Parts Sales departments concerning approved versions for jurisdictions of intended use.

Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a cash box and its contents through the entire cash process. The ICB system eliminates the need for dedicating cash boxes to specific machines, or putting barcode identification labels on the cash boxes. The cash boxes are tracked electronically eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency is greatly improved.

FREE REGIONAL TRAINING

Give your technicians the tools they need to keep your customers happy and your equipment running at peak efficiency.

Holiday Message

As the year draws to a close, we here at JCM American reflect upon the many new and exciting opportunities made possible by our valued customers. As we venture into new markets with products for the Table Gaming and Vending markets and advance our standard for validator efficiency with the introduction of the UBA and ICB, the JCM family looks forward to keeping our customers on the cutting edge of currency validation technology.
