The JCM Global Website provides the tools required to service all of our products. This includes a Software information database containing DIP Switch information, Customer Notifications, Product Manuals, Diagnostic Applications and more.

## Parts are Parts

**Part No.** 701-000211R

**Description:** UBA Cash Box Door Replacement Kit

**Usage:** JCM offers a Kit to replace broken Cash Box Doors on a 500 Note Cash Box. The Kit consists of the replacement Door and the two (2) C-clips that become damaged when removed from the broken Unit. To replace the Door, open the Unit and remove the two C-clips that hold the Hinge Pins in position ①. Start Pin removal by using the C-clip groove to expose the Pin's Head ②. Now, pry the Pin out ③ enough to grasp with your Fingers. Grasp the Pin and slide it out of the Cash Box Hinge ④. Repeat process and remove the other Pin ⑤. To re-assemble, insert the new Door ⑥ and slide both Pins completely in position; then lock the Pins in position using the two (2) new C-clips provided in the Kit ⑦.

\* an "i" suffix indicates Intelligent Cash Box option.

The list of JCM Banknote Validator Software provided herein notifies Customers of the latest Software Versions developed. However, the listing does not identify Versions approved by Gaming Jurisdictional Authorities for actual use. Customers should always consult the JCM's Parts Sales Departments concerning approved Versions for use in their specific jurisdictions intended for operation.

## Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a Cash Box and its contents through the entire cash process. The ICB system eliminates the need for dedicating Cash Boxes to specific machines, or putting barcode identification labels on the Cash Boxes. The Cash Boxes are tracked electronically eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency is greatly improved.

## Technical Tips

**Question:** How can I create In-House Training to support my JCM Product line?

**Answer:** JCM offers Product Training Classes for all of our Validator equipment. If your Facility desires to conduct its own In-House Training, JCM offers its Training Guides ① used in its JCM Classes for download so that each Customer can create their own In-House Training Classes using the same guidelines offered at a JCM Training Facility.

To download the Training Guide material, visit the JCM Website at:

<http://www.jcmglobal.com/en/support/training/courses.aspx>.

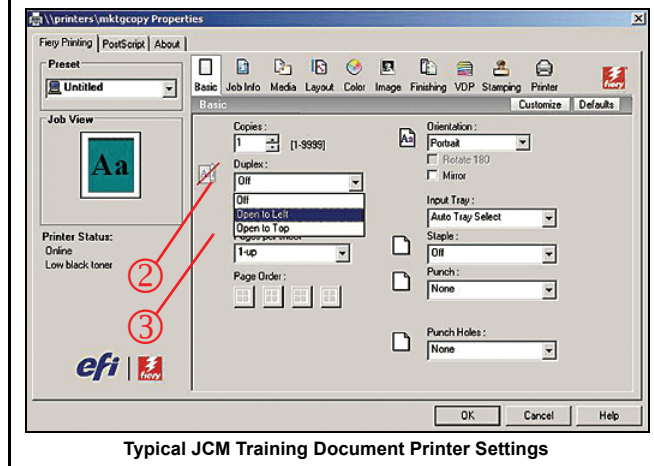

The Guides are available in printable PDF Format and as Adobe Flash, Page-Flip versions. These Guides will take the student step-by-step through Diagnostic Procedures, Software Downloading and various Fault Recognition processes.

**NOTE:** To print a downloaded Guide, it is best to have dual-sided printing capability on your Printer. Be sure to set the Printer's Duplex Function ② to "Open to Left" ③ or set it to use the "short side" of the paper to print.
