The JCM Global Website provides the tools required to service all of our products. This includes a Software information database containing DIP Switch information, Customer Notifications, Product Manuals, Diagnostic Applications and more.

## Parts are Parts

**Part No.** 400-100567RA

**Description:** Harness, UBA-24

**Usage:** The UBA-24 Acceptor was developed for use as an Up-Stacking Unit. It can also be used as a Down Stacking Unit just like the UBA-14. The UBA-24 contains a Barcode Sensor located on the Lower Sensor Board as well as a Barcode Sensor located on the Upper Sensor Board. The choice as to which Sensor is being used is determined by the Harness on the Unit's Frame. On a UBA-24 Harness, Pin 20 is brought to Ground by adding a Jumper wire to Pin 13. This will switch the Lower Barcode Sensor ON for use in an Up-Stack configuration.

**Note:** If a UBA-24 only accepts Barcode Tickets upside down, the Harness may be the wrong type for the current Frame Type installation.

## Save Time and Labor with JCM's Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a Cash Box and its contents through the entire cash process. The ICB system eliminates the need for dedicating Cash Boxes to specific machines, or putting barcode identification labels on the Cash Boxes. The Cash Boxes are tracked electronically eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency is greatly improved.
