Parts are Parts

Figure 1: UAC Kit for iVIZION®/TBV™

The Latest JCM Software Listing (shown above) identifies specific software versions that have been released to OEMs. It is the responsibility of the OEM to obtain all required approvals from Gaming Regulators and Jurisdictional Authorities necessary for use of approved software versions. Contact the Game Manufacturer (OEM) for information on specific software releases approved for use within your gaming jurisdiction.

JCM recommends using the latest version for maximum acceptance, security, and performance.

Part No. 701-100112R

Description: UAC Kit for iVIZION®/TBV™

Usage: The UAC Kit for iVIZION®/TBV™ (Figure 1) is used for testing iVIZION/TBV Units, and provides power and a USB connection to a PC.

Note: The output to the iVIZION/TBV Unit can be selected by setting DIP Switch No. 1 to RS-232 or Photo-Coupler. The Universal Power Supply can be switched from 12Vdc (for iVIZION) to 24 Vdc (for TBV). The USB connection allows access to JCM Support Applications from the USB Port and the PC. The Kit includes: UAC Module, Universal Power Supply, iVIZION/TBV Harnesses, USB mini-B cable and AC Power Cable.

JCM Service Offerings

JCM® offers the following services to help keep your JCM Products performing within factory specifications:

Preventive Maintenance Programs	Unit Exchange Programs
Custom Training Classes	ICB® Data Analysis
Warranty and Non-Warranty Service and Repair	Validator Performance Analysis

For additional information, contact your local JCM Sales Representative at (800) 683-7248.

Save Time and Labor with JCM's Latest Intelligent Cash Box System

The ICB® (Intelligent Cash Box) system is a unique cash management system that allows the operator to track a Cash Box and its contents through the entire cash process. The ICB system eliminates the need for dedicating Cash Boxes to specific machines, or putting bar code identification labels on the Cash Boxes. The Cash Boxes are tracked electronically, eliminating most variance issues, and with the custom reports provided to each department, accuracy and efficiency are greatly improved.

FREE REGIONAL TRAINING

Give your technicians the tools they need to keep your customers happy and your equipment running at peak efficiency.

Technical Bulletin 201401 January 2014

Technical Tips

* IMPORTANT INFORMATION - PLEASE READ *

Question: When a Game Tilt occurs, the iVIZION unit may display either 2 or 3 Red LED Flashes. Initially, replacing the iVIZION Cash Box seems to correct the problem, but it occasionally recurs. What's the best way to resolve this issue?

Answer: An investigation by JCM Engineering revealed several causes, such as scratched or dirty Cash Box sensor lenses, and outside air containing smoke and dust being drawn into the iVIZION unit, settling on the Cash Box sensor lenses.

Cleaning the Cash Box Sensor lens at the Game as part of routine periodic preventative maintenance procedures will help resolve this issue.

To do so:

1. Remove the Transport.
2. Use a damp cotton swab to clean the six (6) Cash Box Sensor lenses (Figure 2).
3. Use a dry Microfiber cloth to gently remove any moisture from the lenses.
4. Inspect each lens carefully for scratched or damaged surfaces. If scratched or damaged, the Cash Box Lens will need to be replaced.
5. Reinstall the Transport.
