JCM AMERICAN GEARS UP FOR G2E 2004 WITH TWO REVOLUTIONARY PRODUCTS

Trident™ Table Safe System, UBA™ Bill Validator Latest Products from Currency Expert

LAS VEGAS – It's hard to imagine the past when slot machines didn't come standard with embedded bill validators. JCM revolutionized the gaming industry with that invention, and now the company is preparing to shape the future of gaming with two new groundbreaking products at G2E 2004.

The Trident table safe system does for table games what the embedded bill validators did for slot machines. Trident automates the table game process and for the first time ever provides live, real-time data to the pit. The improved, automated process begins at the table, where the Trident replaces the plastic paddle and box with a secure, trackable, online system, with a 2,000 note capacity. Trident brings to the pit real-time drop data, continuous table status, an audit of each asset dropped for the entire revenue day, secure asset tracking, and increased security. Additionally, the Trident accelerates soft count results and reduces soft count variances.

JCM Vice President of Development Doug Edwards said, "Trident marks a new future for table games. Real-time reporting, secure asset tracking, more accurate counts, and all of this with no extra steps for the dealer. We are extremely excited about this product, and we are looking forward to introducing it to the casinos."

(more)

In addition to the Trident, JCM will also unveil its new UBA Bill Validator. The UBA builds on JCM's world-famous world bill acceptor, and combines improved bill-sensing technology with lightweight and durable plastic construction. What's remarkable about the new UBA is its ability to accept all of the world's currency, with automatic note centering up to 85mm width, without any hardware changes and in one version of software.

Edwards said, "The UBA truly marks a new day in currency validation. It provides an advanced design, more security, more sensing technologies and is the most universal product available. Casinos everywhere will feel more secure with the new UBA."

The future of gaming will be on display in JCM's booth #4734, where it will be showing the Trident, the UBA and many more currency solutions.

About JCM

JCM American Corporation is the industry leader in currency handling equipment. From its international headquarters in Osaka, Japan and subsidiaries in Hong Kong and Germany to its United States headquarters in Las Vegas, JCM's progressive spirit continues to set world-wide industry standards with innovative products such as the World Bill Acceptor (WBA). JCM provides its products, software and services to the gaming, banking, amusement, vending and petroleum industries. For more information, visit www.jcm-american.com.
