JCM AMERICAN SET TO UNVEIL LANDMARK PRODUCT AT UPCOMING NAMA EXPO

Triton™ Note Recycler Opens Door to Multi-vending, Increased Profits

LAS VEGAS – The future of vending will soon be a lot more profitable, thanks to a revolutionary new product from JCM American. The Triton is a note-recycling device that enables vending machines to multi-vend and give bills back as change. Triton opens the door to a new world of customer satisfaction, operator flexibility and profit potential.

JCM will unveil the Triton at the upcoming NAMA National Expo. The trade show takes place October 14-16 at the Lakeside Center at McCormick Place in Chicago. JCM will be in booth 347.

JCM's Triton is the first note-recycling unit and was developed after the company recognized that being able to accept higher denominations created uplift in sales and dispensing \$1 bills decreased coin starvation.

Field test results have shown large increases in revenue on each machine where the unit's multi-vend feature was enabled and a Triton recycler was installed. In addition to test data, customer interviews have shown a high level of customer satisfaction.

JCM Vice President of Development Doug Edwards said, "We are very excited about Triton and the revolution it brings to vending. The successes of the field tests we have conducted are

meaningful to the entire vending industry and we forecast high profit potential for vending operators.”

About JCM

JCM American Corporation is the industry leader in currency handling equipment. From its international headquarters in Osaka, Japan and subsidiaries in Hong Kong and Germany to its United States headquarters in Las Vegas, JCM's progressive spirit continues to set world-wide industry standards with innovative products such as the World Bill Acceptor (WBA).
