NEWS RELEASE

JCM GLOBAL BRINGS BETTER, FASTER, SMARTER SOLUTIONS TO G2E ASIA

LAS VEGAS (May 16, 2011) – JCM Global has been leading the gaming industry with innovative products that are better, smarter and faster. Now the company is on its way to Macau for G2E Asia, and visitors to JCM Global booth #829 will see the company's new iVIZION® bill validator, new PayCheck 4™ thermal printer and new Vantage™ table game bill validator.

First, iVIZION is the better, faster, smarter solution for the gaming industry and forever changes the way the industry sees banknote validation. It is the foundation of intelligent validation and sees better, thinks smarter and runs faster than any comparable product in the industry. iVIZION bill validator is complete with Contact Image Sensor (CIS) Technology, 99%+ acceptance rate, the most diligent counterfeit protection, RFID ICB cashbox with encrypted and web-enabled data, 64 megabit FLASH memory, a self-calibrating sensor package, modular component design, ability to read barcodes horizontally and vertically, two high-speed processors, sealed 85 mm banknote path, patented and proven removable stacker mechanism, "Blind Mate" and "Hot Swap" design and complete compatibility with all gaming protocols.

Next is the new PayCheck 4 thermal printer. Only the PayCheck 4 from JCM Global can print a ticket in just 0.6 seconds. In fact, the PayCheck 4 is so lightning fast, there's no need to rely on a "burst," like some other, lesser printers do. The PayCheck 4 also has the most memory of any printer in gaming, so it can store more fonts, images, logos and barcodes so you can personalize your player's gaming experience. The RoHS-compliant PayCheck 4 has the longest-lasting head of any printer in the industry.

Last, JCM Global will show an advanced prototype of its new Vantage™ table bill validator. The Vantage was specifically created for the Macau market, where players typically buy-in to table games with a brick of notes. With the Vantage, instead of the dealer taking several minutes to count, notes can be counted at a blazing fast eight notes per seconds, dramatically increasing table game speed and the number of games played per hour. Its wide bill opening can accept a range of currencies, including Hong Kong dollars, Euros, Singapore dollars and US dollars.

The industry is getting better, smarter and faster with products from JCM Global.

JCM Global is the world's leading supplier of innovative automated transactions solutions for the banking, gaming and retail industries. With unsurpassed service and support, JCM Global is trusted by operators, manufacturers and integrators on six continents. Its extensive line of award-winning products set global standards with ground-breaking products like the iVIZION®, Universal Bill Acceptor (UBA®) and Vega-RC™ bill validators, Intelligent Cash Box (ICB®) and PayCheck 4™ thermal printer.
