JCM Global Brings Global Currency Validation Expertise to Gamenet Expo 2012

DUSSELDORF, Germany (28 February 2012) – [JCM Global](http://www.jcmglobal.com), the world's leading casino solutions provider and "[Best Street Supplier of the Year](#)," is bringing its global currency validation expertise to the 7th annual Gamenet Expo.

This year's Gamenet Expo takes place 9–11 March at the EKEP Exhibition Centre in Athens. JCM Global will be in stand #129, where it will show its award-winning line of bill validator products, including iVIZION[®], UBA[®] and UBA-RC, Vega-RC[™] and JCM's newest product, the iPRO[®] and iPRO-RC[®]. JCM Global will also be showing the award-winning PayCheck 4[™] thermal printer.

"In markets across the entire EMEA region and around the world, JCM Global has proven products that help operators increase security, defeat cheats and counterfeiters, and add to the bottom line with the highest acceptance levels of any products," said JCM Global EMEA General Manager Payam Zadeh.

JCM Global's new iPRO is the secure and flexible way to increased profitability because it comes with one of the most sophisticated sensing and anti-fishing packages JCM has ever created. iPRO's modular design means it can quickly and easily replace an existing UBA head for instant improved performance. iPRO's many features include a sealed bill path for dust, water and light protection; seven Wavelength optical and magnetic sensors; dual exit sensors with anti-pullback drum device; ICB optional add-on; and a replaceable bezel holder.

iPRO-RC adds a recycling feature to iPRO that further reduces operational costs. iPRO-RC has two large-capacity chambers with Roller Friction Recycling Technology holding recycled notes for instant payouts, keeping equipment running and customers happy. Plus, the iPRO-RC has JCM's powerful anti-stringing technology, proven note acceptance and lockable removable cash box.

The award-winning [iVIZION](#) is the better, faster, smarter solution for the gaming industry and forever changes the way the industry sees banknote validation. It is the foundation of intelligent validation and sees better, thinks smarter and runs faster than any comparable product in the industry. iVIZION is complete with Contact Image Sensor (CIS) Technology, 99%+ acceptance rate, the most diligent counterfeit protection, RFID ICB cashbox with encrypted and web-enabled data, 64 megabit FLASH memory, a self-calibrating sensor package, modular component design, ability to read barcodes horizontally and vertically, two high-speed processors, sealed 85 mm banknote path, patented and proven removable stacker mechanism, "Blind Mate" and "Hot Swap" design and complete compatibility with all gaming protocols.
