JCM Global Installs 10,150 iVIZION® Units and 3,750 PayCheck 4® Printer Units in Just 30 Days, Most Bill Validator and Printer Installations in One Quarter in Company's History

LAS VEGAS (June 14, 2012) – JCM Global, the world's leading automatic transactions solutions provider to the gaming industry, is on an unprecedented winning streak, exclusively installing 10,150 units of its award-winning iVIZION® bill validator and 3,750 units of its award-winning PayCheck 4® thermal printer in casinos across the country in just 30 days.

The 30-day period was part of the most successful quarter in the company's history.

JCM installed 2,100 iVIZION bill validators at Horseshoe Casino Cleveland; 1,800 iVIZION units at Scioto Downs; 2,000 iVIZION units at Hollywood Casino Toledo; 3,700 iVIZION units and 3,200 PayCheck 4 thermal printers at Maryland Live! Casino; and 550 iVIZION bill validators and 550 Paycheck 4 printers at Oxford Casino. All of the installations took place in less than a 30-day time frame.

"We are absolutely thrilled with the new relationships we have developed with operators across the country and around the world. To have achieved this level of success is remarkable, and speaks to the strength of our products and our total commitment to customer service," said JCM Global Vice President of Global Sales Mark Henderson.

"Operators everywhere are seeing how iVIZION and PayCheck 4 can transform their business. And with their open-ended architecture and future-proof technology, iVIZION and PayCheck will build on their foundation and keep operators seeing green for years to come," he added.

The iVIZION bill validator is the better, faster, smarter solution for the gaming industry. iVIZION's Contact Image Sensor (CIS) Technology captures the full image of a note or ticket, and its 99%+ acceptance rate is unrivaled.

PayCheck 4 is the fastest printer in the industry, printing and presenting a complete ticket twice as fast as competitive printers; has the most standard memory of any type printer; and is the longest-lasting printer in the industry, with a print head that lasts twice as long as any competitive product.
