JCM Global Wins Preferred Vendor Contract and Bill Validator, Printer and Display Contracts with APEX in Eastern Europe

DÜSSELDORF, Germany (18 June 2012) – JCM Global's winning streak continues to build around the world. Now JCM has won two contracts for its award-winning iVIZION® bill validator in Eastern Europe.

First, JCM was named the preferred vendor to APEX, one of the largest manufacturers and casino operators in Eastern Europe. Additionally, JCM will install iVIZION bill validators, PayCheck 4® printers and digital display solutions at Casino Strazny, which is owned and operated by APEX in the Czech Republic, and will roll it out to all other APEX casino.

APEX General Manager Johannes Weissengruber said, "Choosing a preferred supplier is a very big decision for APEX. Because we both manufacture devices and operate casinos, we have a large interest in ensuring that the products we choose are the best in the market. We reviewed many products, and we selected iVIZION because its abilities and future-thinking platform would help us succeed today and tomorrow."

"We are extremely delighted by this decision by APEX, one of the region's most respected suppliers and operators. We built iVIZION to be the foundation of intelligent validation, and that what APEX and operators all over the world are seeing for themselves – that iVIZION is the better, smarter, faster product for today and far into the future," said JCM Global EMEA General Manager Payam Zadeh.

"Additionally, our PayCheck 4 printer is the perfect partner to iVIZION and our digital display solutions create a comprehensive package that enhances the player experience."

JCM began a winning year in Europe being named ["Best Street Supplier of the Year"](#) at the Totally Gaming Awards 2012 and being nominated as "Payment Solutions Provider Company of the Year" in the International Gaming Awards.

The iVIZION bill validator has the most diligent counterfeit protection, an RFID ICB cashbox with encrypted and web-enabled data, 64 megabit FLASH memory, a self-calibrating sensor package, modular component design, ability to read barcodes horizontally and vertically, two high-speed processors, sealed 85 mm banknote path, patented and proven removable stacker mechanism, "Blind Mate" and "Hot Swap" design and complete compatibility with all gaming protocols.
