JCM Global Named Preferred Supplier by Noro-Automaten in Germany

DÜSSELDORF, Germany (20 June 2012) – JCM Global continues to score important victories in Europe. Just days after being named a preferred vendor by a major supplier/operator, JCM has been named the preferred supplier by Noro-Automaten, one of the largest free unbounded distributors, services providers and gaming hall operators in Germany.

JCM will supply its UBA-RC™ bill validator, Intelligent Cash Box (ICB®) system, PayCheck 4® thermal printer, and digital display solutions to Noro-Automaten gaming halls and bet & win shops throughout Germany.

Speaking for Noro-Automaten, Managing Director Harry Karolczyk said, "It was very important for us to optimize our cash handling processes. The UBA® has been considered to be the top-of-the-line product across Europe for years, and we were extremely impressed by its new recycling functionality, and we found it to be the perfect solution for our needs."

"We are thrilled to be named Noro-Automaten's preferred supplier. Operators of all sizes and in many industries are discovering that JCM's UBA-RC recycling bill validator is the perfect solution to their needs because it reduces operational costs, provides outstanding protection against counterfeits and has the best anti-stringing technology available," said JCM Global EMEA General Manager Payam Zadeh. "Our PayCheck 4 printer is the perfect companion to UBA-RC, and our digital displays are the dynamic way to attract and engage customers."

The UBA-RC recycling bill validator has two high-capacity recycling chambers that recycle two denominations of up to 100 notes each, which reduces float and dramatically reduces downtime. Its compact design makes it the perfect solution for all global applications, and its wide bezel accepts notes up to 85mm wide. Its field-proven UBA sensor package gives operators the best counterfeit protection and first-time acceptance, and its Roller Friction Recycling Technology provides direct bulk note refill into recycling chamber for optimum uptime.

The ICB system helps casinos eliminate several points of human error for a faster, more efficient drop process that reduces waste and adds to the bottom line, and ICB's new web reporting gives users the reports they want, when they want them.

The easy-to-install PayCheck 4 is the fastest printer in the gaming industry, printing and presenting a complete ticket twice as fast as competitive printers. Next, PayCheck 4 has the most standard memory of any printer in the industry, giving operators more power and flexibility to communicate directly with their customers. Last, PayCheck 4 is the longest-lasting printer in the industry, with a print head that lasts twice as long as any competitive product – an average life span of 640,000 slot-type tickets.

JCM's digital display solutions help operators attract and inform customers. JCM offers a wide range of flexible display solutions and software options that empower operators to communicate dynamically and directly with customers.
