JCM Global's New DNA (Dynamic Network Applications) Named to Top 20 Most Innovative Gaming Technology Products Awards List

LAS VEGAS (March 5, 2013) – Coming off its most successful ICE show to date, [JCM Global](http://www.jcmglobal.com), the proven leader in currency validation solutions, is celebrating because its new DNA (Dynamic Network Applications) has been named to the *Casino Journal* magazine's 16th annual Top 20 Most Innovative Gaming Technology Products Awards.

"We are thrilled to have been named to the Top 20 Most Innovative Gaming Technology Products Awards. JCM was founded more than 50 years ago with a spirit of innovation that drives us to create new solutions that make our customers better, smarter and faster. That spirit fuels our efforts still today, and we are honored to be acknowledged for our newest game-changing creation, DNA," said JCM Global Vice President of Global Marketing Tom Nieman.

Built on the award-winning [iVIZION®](#) bill validator's foundation of intelligent validation, DNA is an incredible set of bundled enhancement tools that empower casino operators to do much more than ever thought possible, and in real time.

Operating wirelessly or hard-wired, DNA passively monitors the EGM "SAS" line for critical housekeeping data, while securing two-way communication with all critical peripheral components. With JCM's DNA, operators can get extensive reports and alerts in real time and deliver firmware updates instantly, with no downtime, across the entire operation. DNA also enables regulators to instantly verify peripheral devices, software versions, view reports and more. In other words, this original technology is even further enhancing profitability, productivity and efficiency.
