**JCM Global Helps Operators Create Better Connections at G2E Asia 2015 with
Bill Validation Technology, Printer Technology, System Solutions and Digital Media Solutions**

MACAU, China (23 April 2015) – JCM Global is the local source for operators throughout markets in Asia and Australia who want to deepen connections with their customers. Now JCM is bringing its better, smarter and faster bill validation technology, printer technology and systems solutions to stand 339 at G2E Asia.

JCM's advanced and diverse product portfolio begins with its award-winning line of **bill validation technology** featuring iVIZION® with the most advanced validation security features and anti-stringing technology available, all with an acceptance rate of 99+ percent; iVIZION®-HC®, with its high-capacity cash box; iPRO™ and iPRO-RC™, with an optional recycling feature; UBA®, Vega™ and Vega-RC™; Taiko™ Pub; the DBV-400™ and DBV-500™; and the TBV® that can accepts single notes or stacks of notes in multiple currencies simultaneously.

Of particular interest to operators in Macau and other regions with high-volume wagering at table games is JCM's iV8™ table game bill validator that can validate and process large stacks of notes at 8 notes per second, dramatically reducing buy-in time and increasing the number of potential hands dealt per hour.

Connections are enhanced with FutureLogic **printer technology** featuring products with the speed, flexibility and durability to meet operators' demands.

The connection continues with JCM's **system solutions**, including Dynamic Network Applications™ (DNA), Intelligent Cash Box (ICB®), PromoNet®, Ticket2Go™ and TableXchange®. PromoNet® intelligent couponing identifies valuable players, targets both carded and non-carded players, links promotions to game-play and delivers promotions exactly where and when they are needed.

Perfect for AWP and low-payout markets, Ticket2Go delivers a networked TITO solution and the proven network-less Ticket Payout feature. Multi-lingual and multi-currency, Ticket2Go offers a retrofit ticketing solution for gaming machines that do not support open standard ticketing protocols.

Also showing is the TableXchange®, which brings the convenience of TITO to the table by both accepting and paying out with TITO tickets, allowing full two-way transactions compatible with existing casino TITO systems, increasing convenience for players and streamlining operations by virtually eliminating the need to replenish chips at table games.

The connection is completed with **JCMedia**, a complete line of digital displays, production services and media management systems that empower operators to communicate directly with customers in a digitally dynamic fashion.

Start making better connections by joining JCM at G2E Asia on stand 339 and on Facebook, LinkedIn and Twitter.
