**TCSJOHNHUXLEY Chooses JCM Global's iVIZION, GEN2 U Printer
for its new Qorex Electronic Gaming Solutions**

DUSSELDORF, Germany (25 April 2017) – Leading live table game manufacturer TCSJOHNHUXLEY has chosen JCM Global's award-winning iVIZION® bill validator and GEN2 U™ thermal printer for its new range of Qorex electronic gaming solutions.

The recently launched Qorex Terminal is a highly flexible multi-game product that allows live, automatic and system driven play of Roulette and Baccarat. The innovative terminal design incorporates a widescreen 27" HD display along with eye-catching system controlled LED's and because it's modular, it can be configured to suit any casino floor. Qorex features an intuitive easy to navigate interface which allows players to swap easily between games and the integration of JCM's products, provides additional security and ease of play.

Terry West – Hardware Engineering Manager for TCSJOHNHUXLEY comments, "The introduction of our Qorex range of products is a major milestone for the company. We have a reputation of manufacturing the highest quality products that are innovative market leaders, as well as secure and reliable. It is therefore imperative that all components for Qorex meet these standards, which is why we chose to incorporate JCM products."

JCM EMEA General Manager Payam Zadeh said, "We are very pleased that TCSJOHNHUXLEY has chosen JCM's iVIZION and GEN2 U products for their new Qorex electronic gaming terminal. Suppliers across Europe and around the world trust JCM and our products to be a perfect and secure complement to their games, enabling suppliers to sell their games with confidence to their operator customers."

JCM's industry-leading iVIZION protects operators from counterfeiters and cheats with a powerful combination of sensing and anti-stringing technology. iVIZION's CIS technology captures the entire note or ticket for the ultimate in security.

The GEN2 U™ thermal printer is equipped with ITH® (Intelligent Ticket Handling) technology, IntelligentBezel™ system for paper jam reduction via blocked bezel detection, ProColor™ printing with readily available 2-color printing technology, a large paper capacity, and an expanded graphics memory.
