JCM Global Brings World's Leading Peripheral Solutions to G2E Asia

JCM on stand B1323

LAS VEGAS (May 20, 2024) – JCM Global® (JCM) is the leading provider of peripheral solutions for the gaming industry throughout Asia. Now the company is bringing a collection of its landmark products, essential pieces in JCM's technology roadmap for operators, to G2E Asia. JCM will be on stand B1323.

JCM is focused on the success of the Asian gaming market and serves clients of all sizes throughout the region. General Manager Asia Pacific Ian Payne said, "We are committed to the success, safety, and compliant operation of gaming throughout Asia, and the industry-leading solutions from JCM protect operators with the highest levels of security that also maximize efficiencies and increase compliance."

JCM will show its iVIZION® and UBA® Pro bill validators, GEN5® thermal printer, FUZION® system, ICB® Intelligent Cash Box system, and BlueWaveDX™ hand-held firmware upload tool.

iVIZION is the gaming industry's leading bill validator and sees better, thinks smarter, and runs faster than any product in its class. UBA Pro delivers reliable performance with a low cost of ownership. GEN5 has faster print speeds and larger memory for ticket printing and advanced couponing messages.

iVIZION or UBA Pro and GEN5 empower FUZION, which offers dozens of benefits for casinos, including real-time peripheral performance data; proactive alerts for drops, e-drops, and fills; real-time asset monitoring and tracking; and dispute resolution with high resolution banknote/TITO images.

The ICB system eliminates human error and increases accuracy throughout the entire drop process, which helps to increase compliance. The BlueWaveDX tool makes updating, configuring, and testing JCM bill validators and printers fast and easy.

Discover what JCM's technology roadmap can do for your gaming operation on G2E Asia stand #B1323, and join JCM on [LinkedIn](#), [Facebook](#), and [YouTube](#).

About JCM Global

JCM Global is a world leader in transaction and payment technologies.
