JCM Global Celebrates 70 Years of Innovation at G2E 2025

JCM's award-winning solutions, cutting-edge products fill booth #4039

JCM Global® (JCM) is celebrating 70 years of bringing the industry's leading innovations and transformative technologies to customers worldwide that boost security, increase efficiencies, and enhance the customer experience. At G2E 2025, JCM will showcase its award-winning solutions and cutting-edge products in booth #4039.

Attendees will experience JCM's award-winning bill validators, iVIZION®, UBA Pro®, and DBV®, each equipped with best-in-class technologies proven to provide the highest levels of security and acceptance in automated transaction environments. iVIZION is globally recognized for its industry-leading CIS Contact Image Sensing technology, a breakthrough that scans the entire note or ticket, front and back, for unmatched security.

In addition to bill validators, JCM is one of the industry's most prolific system developers. On display will be multiple pioneering solutions, including ICB® Intelligent Cash Box system, FUZION®, PromoNet®, and CountR's TITA™.

ICB is the award-winning system proven to eliminate multiple points of human error, streamline the entire drop process, and enhance compliance. GLI Certified, FUZION offers a comprehensive suite of features such as BLE mobile wallet connectivity, real-time peripheral performance data, proactive drop/fill alerts, and real-time asset monitoring.

The patented PromoNet® couponing system reaches carded and uncarded players across the gaming floor, and the advanced TITA table game solution enables funds access directly to the table.

JCM's Digital Signage Solutions offer a bright and flexible way to communicate with guests, both indoors and outdoors. JCM will show a wide range of emerging display technology, including CLEAR™ displays in curved, flat, and hanging configurations; LED walls; and ePOSTERs.

JCM will also feature its GEN5®, CouponXpress™, and EP802 printers, the standards for thermal printers in the gaming industry. JCM's reliable, smart printers give casino operators the flexibility and power they need to communicate accurately and directly with players through TITO tickets and promotional coupons.

JCM will also present the technologically advanced ICB ASAP®, a complete solution for the count room, powered by advanced robotics for speed and accuracy.

Additional highlights include the BlueWaveDX™, JCM's hand-held firmware upload and troubleshooting tool, and G+D's C5 count-sort machine, which integrates seamlessly with JCM's system technology to deliver greater efficiency and security in the count room.

About JCM Global
JCM Global is a world leader in transaction and payment technologies. From its global network of offices, the company provides award-winning solutions such as bill validators, note recyclers, printers, systems solutions, and

more. Since 1955, its spirit of innovation has resulted in ground-breaking products and components that have earned multiple patents and set worldwide standards. JCM is trusted by operators and suppliers in the banking, gaming, kiosk, retail, transportation, and vending industries. Please visit www.jcmglobal.com for more information.
