New Property in Oklahoma Opens Protected by Award-winning Technology from JCM Global

iVIZION, ICB exclusively on each of the casino's 1,000+ EGMs

LAS VEGAS (June 2, 2026) – A newly opened casino in Chandler, Oklahoma, is welcoming guests, and each of the casino's 1,000+ state-of-the-art slot machines is protected by the leading technology of the iVIZION® bill validator from JCM Global® (JCM). Additionally, the casino floor and count room benefit from a more efficient drop process with JCM's pioneering ICB® Intelligent Cash Box system.

"We are thrilled to have been exclusively chosen to supply iVIZION bill validators and the ICB Intelligent Cash Box system at another new Oklahoma casino," said Dave Kubajak, SVP – Sales, Marketing & Operations. "Tribal and commercial casino operators around the world recognize that iVIZION and ICB are the most advanced solutions available, offering the highest levels of security and efficiency, on the casino floor and in the count room."

JCM's iVIZION is the leading bill validator in its class, unmatched in protection and performance. Its advanced Contact Image Sensor (CIS) technology enhances security by scanning 75 times more data points than any bill validator, capturing the full image of both sides of a banknote or ticket, all while maintaining the fastest and highest acceptance rate.

JCM's ICB Intelligent Cash Box system speeds the entire drop process while also eliminating human error, increasing accuracy, and increasing compliance. Because it drives efficiencies, ICB is proven to reduce annual operating costs for operators. It provides increased visibility and efficiency for the drop and count processes, such as monitoring of bill validator metrics, customizable web reports, and maintenance planning to dramatically increase operational efficiency.
