

[Quality / Environmental Policies]

◆ Quality Policies

1. We make products and provide services in pursuit of customer satisfaction and work to earn trust from our customers by taking proactive / preventive measures against quality issues.
2. We ensure product quality and enhance product reliability by focusing on quality management in the design and development stages.
3. We maintain the effectiveness of our Quality Management System and continuously make improvements to keep the system practical and useful.
4. We review our Quality Policies / Objectives periodically to maintain their appropriateness and make them well known to all employees.

◆ Environmental Policies

1. We do our best to prevent environmental pollution and protect global environment by complying with environmental laws and regulations and requirements from related industries.
2. We conduct business activities with consideration for environment, health and safety and aim to reduce environmental load for the entire product life-cycle stages.
3. We set Environmental Objectives, review them periodically, and continuously make improvements to our Environmental Management System.
4. We convey our Environmental Policies to all employees to raise awareness and announce them to our stakeholders for their cooperation on environmental protection activities.
