

MOBILE I/O®

Powering Contactless Solutions at Electronic Gaming Machines

ADVANCED BLUETOOTH CONNECTIVITY

- 2D barcode pairing provides an easy path for installation
- Bluetooth technology is convenient, versatile, and available on all mobile devices

IMPROVED KYC AND AML CAPABILITIES

- Identity verification for every financial transaction
- Suspicious activity and money laundering traceability back to all user accounts

UNIVERSAL APPLICATION CONNECTIVITY

- Any application can interface with Mobile I/O through secure APIs
- Allows for location-based services and geolocation
- Applications can notify patrons of available promotions, expiring player funds, or specific events

SYSTEM AND MACHINE AGNOSTIC

- Compatible with any EGM featuring JCM's iVIZION® and UBA® Pro bill validators, GEN5® printer, and FUZION® technology

MOBILE I/O® ENABLES ANOTHER WAY TO PLAY.

The Mobile I/O® (Input/Output) Device is an internal module that uses Bluetooth Low Energy (BLE) to enable contactless transactions at an EGM (Electronic Gaming Machine). Mobile applications developed to interface with Mobile I/O can allow a player to securely identify their EGM location for mobile transactions, mobile marketing and promotions, mobile player identification, and more. To complete a transaction, pertinent information is communicated from the users' mobile device to the PNA® through the FUZION® system.

Powering Contactless Solutions at Electronic Gaming Machines

GENERAL SPECIFICATIONS

Communication Method

Bluetooth 5.0 Low Energy

Connectivity

USB Full Speed

Power

USB +5V

Security

- ECC
- AES-256
- SHA-1
- SHA-256
- SHA-512
- True Random Number Generator

Certifications

- CE
- FCC
- KC
- RoHS
- REACH

Compatibility

Compatible with most smart devices

Installation

Simple 2D barcode placement on EGM

Configuration app to securely pair 2D barcode with unique BLE signal

MOBILE TRANSACTIONS MEAN MORE TRANSACTION OPTIONS

Give players the ability to interact with your EGMs the way they want with a new mobile connection option. Contactless payment technology does not replace other transaction methods but increases player convenience with more choices and more ways to play.

EASY TWO-STEP INSTALLATION

With a simple USB port connection, Mobile I/O makes installation straightforward. After being plugged into JCM's PNA unit inside the EGM and placing a 2D barcode on the outside of the EGM, Mobile I/O is ready to interface with integrated mobile wallet applications through secure APIs.
