

TITA

Unlocking Transaction Solutions at the Table

TITO AND SMART CARD SYSTEM CONNECTIVITY

- Connects to all major TITO and smart card systems to bring alternative payment technology to live games

DEBIT TRANSACTION CAPABILITY

- Cash access with POS card reader to securely process debit card transactions

FAST CURRENCY VALIDATION

- Bulk insertion of up to 30 notes at a time
- 2-notes per second banknote speed processing banknotes quicker than ever
- High capacity cash box for up to 2,200 banknotes/tickets neatly stacked
- Secure ATM-grade note validation protects against counterfeits

LIVE DATA REPORTING AND DASHBOARD

- Real-time monitoring of banknotes, tickets and cashless transactions
- Statistical performance dashboards

SMALL FOOTPRINT

- Packaged in small modules to fit to any table configuration

TITA™ BRINGS ALL THE FUNCTIONALITY OF A REDEMPTION KIOSK TO THE TABLE.

CountR's TITA table game solution optimizes operations, increases funds access, and improves cash flow. TITA combines the smart handling of TITO and cashless transactions with the reliability and security of JCM Global's MRX™ bill validator. Through TITA, players easily redeem tickets and other cashless funds for chips, access funds via debit card with the POS, and convert winnings into tickets and cashless, all directly at the table. TITA also enables operators to monitor live transactional activity, to reduce fills and drops at the table games, and to shorten lines at the cashier's cage.

Unlocking Transaction Solutions at the Table

The POS Debit module and MRX™ bill validator are optional upgrades.
